## PROFILE

---

Passionate final-year AIML engineering student eager to apply machine learning and deep learning expertise to real-world challenges. Hands-on experience building and training neural network models, designing ML pipelines, and translating AI architectures into working systems, thriving in high-energy hackathon environments and driven to deliver measurable impact in efficiency, sustainability, and innovation as an entry-level ML/AI engineer.

## EDUCATION

---

**Vivekananda College of Engineering & Technology, Puttur (VTU, Belagavi)**  
*Bachelor of Engineering in Artificial Intelligence and Machine Learning*

*August 2027\**  
*CGPA: 8.78 - upto 6th semester*

**Relevant Coursework:** Machine Learning frameworks and algorithms, Generative AI pipelines for text generation and summarization, NLP systems for sentiment analysis, OS fundamentals, DSA and Algorithm designing.

## TECHNICAL SKILLS

---

- **Industry 6.0 and Emerging Tech:** DevOps, MLOps, Sustainable Engineering Practices, AI/ML for Process Optimizations, LangChain.
- **Core ML tools:** PyTorch, NumPy, Matplotlib, Librosa, Seaborn, Pandas, TensorFlow
- **Tools & Methodologies:** Git, GitHub, Linux, Data Synthesis, Agile Collaboration, Problem Solving, Leadership

## PROJECTS & EXPERIENCES

---

**DADS (Detection and Analysis of Dysfluencies in Speech)** | *Academic Major Project: Python, PyTorch*    *Planning Stage*

- Synthesized and analyzed audio data sets using `librosa` to extract Mel-frequency cepstral coefficients (MFCCs) for clinical troubleshooting and diagnosis.
- Wrote structured code to train a Convolutional Neural Network (CNN), achieving 80% accuracy on the SEP-28k dataset.
- Helped in structuring the pipeline for the entire system against industry standard Deep Learning practices.

**Swaraaha** *June 2026 – Present*

*Academic Major Project: Python, PyTorch, PySide6, React*

- Something goes here.
- Something goes here as well.
- Something goes here too.

**hShell** | *Personal Project: C, Linux Systems* *Jan 2026 – Present*

- Broke down routine technical tasks to develop a custom UNIX-like shell in C, troubleshooting system-level process execution and I/O management.
- A learning project to understand the underlying fundamentals of operating systems.

## INTERNSHIPS

---

**Codex** | *Akanksha Charitable Trust: Project Management, Agile, Go* *Feb 2026 - Present*

- Managing a collaborative team to design and develop a mobile learning application for pre-beginner students, driving organizational goals through agile methodologies.
- Conducting business analysis to define technical responsibilities and oversee the implementation of gamification modules, ensuring continuous software improvement.

**Data Science Analytics** | *Wheeltrix: Python, Pandas, LangChain* *May 2026 - Present*

- Received training on industry-standard machine learning practices, including model evaluation, data preprocessing, and production-ready ML workflows.
- Building projects focused on sentiment analysis using NLP techniques and text summarization using generative AI pipelines.

## ACHIEVEMENTS & CERTIFICATIONS

---

- **Coursera:** Completed ‘Supervised Machine Learning: Regression and Classification’ (Machine Learning Specialization).
- **Winner, Nexthon-2025:** Secured 1st place in a 24-hour national hackathon working in a high-pressure, collaborative team “Luminous” at Shree Devi Institute of Technology, Mangalore.
- **Winner, DevHack-2025:** Secured 1st place in a 36-hour national hackathon at Sahyadri College of Engineering, yet again with the same team “Luminous”.

## EXTRACURRICULAR ACTIVITIES

---

- **Chair:** IEEE VCET Student Branch (STB11471).
- **Student Co-ordinator (2025-26):** Ankuram Annual College Magazine Editorial Board.
- **Joint Cultural Secretary (2025-26)** Bhoomika Kala Sangha, Cultural organization of VCET.
